

***Streptococcus thermophilus* Test Kit**

Catlog Number: BT-QCY-0033

● **Basic Information**

Test Methods: PCR

● **Application**

This kit can be used to perform qualitative and semi-quantitative analysis of *Streptococcus thermophilus*.

● **Specification**

50T

● **Features**

High specificity: No cross-reactivity with other viruses, no non-specific amplification.

High sensitivity: Detection sensitivity can reach 10~100 copies.

Simple operation: Easy and quick operation procedure, no need for complex instruments or professional training.

High throughput: High throughput in a single test, can process a large number of samples in parallel.

● **Storage & Transportation**

Store at -20°C and avoid repeated freezing and thawing.

● **Notes**

The PCR reaction solution should be prepared in ice and then placed on the PCR reactor for PCR reaction.
